

A Hospital Medical diary

By:

Marko Ludaic, Denis Expósito , Nikola Panajotovikj

General concept

- User management = different users will have different privileges
 - ex. nurse, doctor, receptionist, etc.
- Different users will enter data into tables depending on their jobs
- Summary information from all tables in the database will be displayed on one page where all staff have access

Enter patient info

Diagnosis:

Treatment:

Blood work:

[Submit Query](#)

Nurse

PatientID	BloodPressure	Concious	MuscleResponse	Emergency	MentalState

PatientID	Diagnosis	Treatment	Surgery

Doctor

PatientID	Name	Surname	BirthDate	AdmissionDate

PatientID	ReleaseDate

Receptionist

Patient
